Good Morning John

Liz is out a conference this week and half of next week.

I did search the FR and came up with attached notices. It looks like the final was issued in March 12, 2018.

Let me know if this answers your request.

I am looking now for new releases from EPA. But found the last pdf in the attachments showing the rollbacks.

What kind of terms might the EPA use in their news releases to announce this ruling? Does it affect the car emissions? Or is it directed at the industrial side of the oil and gas?

Or are you looking at this ruling from a particular angle?

Thanks for using the library and please don't hesitate to contact us again if you have further questions.

**Subject:** Searching for Fed Reg Notice

Hello. I'm searching for the fed reg notice for the attached proposal, signed by the Administrator on 6/12/17. Q: Was this proposal published? Was a final action published as a follow up to the proposal?

In addition, if you can track down any Agency news releases about the proposal, I'd like that as well.

Thanks,

John Pavitt
